

REPORT OF THE BRIEF

How I learned SQL, Mysql and diagrams:

This is the first time I see SQL, Mysql and diagrams, so I started with documentaion on this tools to know what each tool does and how we use them and when we use it.

After the documentation I moved to the practice to get to know all these diffrent tools, and then I started the Brief.

I started with drawing the Use Case Diagram and Class Diagram and then I moved to SQL and Mysql to change the diagram into an SQL code.

The problems that I faced:

I faced many problems in this brief, but as soon as I found the solution of them by searching on google and asking my friends.

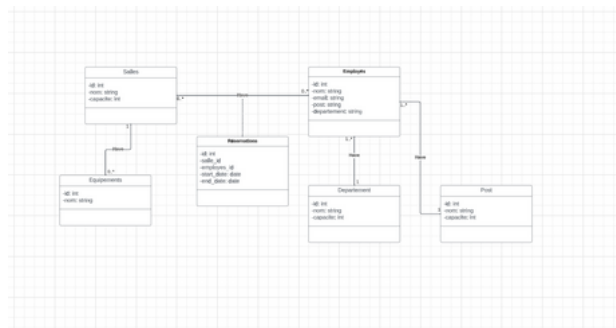

The results:

After the documentation and the practice, these are the results of the brief

Use Case Diagram:

Class Diagram:

And for the SQL code, we will see it in my repo.
